ABOUT ME

As a student of Information Technology at the Faculty of Science, I have a strong desire to learn and grow in a professional environment. During my studies, I have gained experience working both independently and as part of a team. I have developed a portfolio website where you can explore my projects and work. You can visit my portfolio at https://hamzadelic.vercel.app. Additionally, I have prepared demo videos providing a quick overview for each project featured on my portfolio. You can find these videos within the description of each project.

EDUCATION

Faculty of Science
2021 – present
Associate degree
Field: Information technology

Electrical Engineering School for Energetics
High school
Field: Electrical Engineering

WORK EXPIRIENCE

KING ICT
Software Developer intern
April 2023 – May 2023

During my internship, I worked with Oracle APEX to develop the "Student Service" application. This faculty management tool enables faculty administrators handling of professors, subjects and students. Professors can manage subjects and examinations, while students can apply for exams, view their results and track their academic progress.

EXPERIENCE THROUGH STUDY

- Collaborated on a team project to develop a sports hall renting website using React.js as the frontend framework, Django as the backend, and SQLite as the database.

- Developed a web application similar to Slido app using the Express framework with Node.js as the backend, EJS as the frontend framework, and PostgreSQL as the database.

- I designed and developed my portfolio website using React.js, showcasing my skills and projects in a user-friendly and interactive manner.

- Covered web development basics and worked with popular libraries like jQuery, Bootstrap and Material-UI.

- Studied object-oriented programming, data structures and algorithms in C++

- Gained familiarity with Java and developed simple games like Snake and Brick Breaker.

- Developed a strong foundation in programming concepts and logic through coursework in Python

- Gained familiarity with Android development and developed a simple quiz app using Compose

SKILLS

Programming languages and frameworks I've worked with:

- **Backend:**
    - Node.js
    - Express.js
    - Django

- **Frontend:**
    - React.js

- **Databases:**
    - PostgreSQL
    - SQLite
    - Oracle

- **Other:**
    - Oracle APEX
    - Java
    - C++
    - Python
